Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 through 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoshino et al. Patent No. 61-295494 in view of Asano et al. US Patent No. 5,078,207.

Hoshino discloses the applicant's invention as claimed with the exception of providing a connecting member having a bend.

Asano discloses a heat exchanger and fin for the same that does provide a connecting member having a bend (see figure 3). Therefore it would be obvious to modify Hoshino's invention by providing a connecting member having a bend in order to reduce the stresses on the turbulator.

Referring to claims 1 through 5, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

The intended use statements are not given any patentable weight in this instance for example "fluid flowing through the turbulator flows through the louvers in the direction generally parallel to the longitudinal axis".

Art Unit: 3743

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
